Advancing Digital Education and Industry Collaboration in the Western Balkans

The DERHE (Digital Education Readiness in the Field of Higher Education) project aims to enhance digital education in Western Balkan higher education institutions and strengthen their connections with the industrial sector.

- Strengthen HEIs' capacity for networking, digitalization, and skills development.
- Enhance student employability through improved skills and curricula.
- Boost company competitiveness by increasing added value.
- Foster collaboration between HEIs and businesses for mutual growth

Hands-On Innovation: DERHE Study Visit at the University of Ljubljana

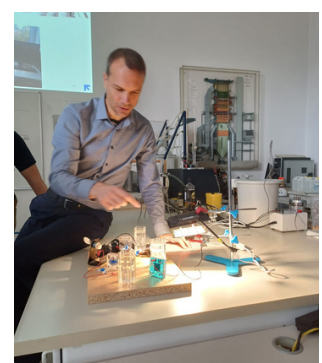

From 7-12 October 2024, the Erasmus+ DERHE project team met at the University of Ljubljana, Faculty of Mechanical Engineering, for a hands-on study visit. Participants engaged in specialized workshops on robotics, energy efficiency, ERP systems, and more, enhancing skills and fostering collaboration.

Exploring Innovation at University of Ljubljana

The Erasmus+ DERHE project team gathered at the University of Ljubljana, Faculty of Mechanical Engineering, for an intensive six-day study visit focused on enhancing collaboration, innovation, and knowledge exchange.

The agenda featured a dynamic lineup of workshops, including simulation, 5S, sound control, compressed media, ERP, robotics, energy efficiency, and SMED. Participants engaged in hands-on sessions and discussions designed to address real-world challenges and improve academic-industry collaboration.

This visit highlights the DERHE project's commitment to fostering international collaboration and advancing digital education readiness through immersive learning experiences.

Event Highlights

- Explored cutting-edge automotive technologies and Industry 5.0 practices.
- Strengthened academic-industry collaboration in line with DERHE's mission.
- Gained valuable insights into real-world industrial innovations.

Driving Innovation: A Visit to Forvia Hella, an Automotive Industry Leader

As part of the Erasmus+ DERHE study visit in Ljubljana, participants had the opportunity to visit HELLA Saturnus Slovenija d.o.o., a leading innovator in the automotive sector. The visit offered valuable insights into the company's advanced manufacturing processes and innovative technologies, including its expertise in automotive lighting systems and sustainability-focused solutions. Touring the facilities, participants observed cutting-edge production techniques that reflect the principles of Industry 5.0 and digital integration. The visit also facilitated meaningful discussions on potential collaborations between academia and industry, aligning with the DERHE project's objective of bridging education and the evolving demands of the industrial sector. This enriching experience highlighted the critical role of partnerships in driving innovation and preparing students and researchers for the challenges of tomorrow.
